Introduction

More than a half-million readers have already been exposed to the controlled vocabulary in *1100 Words You Need to Know* and the techniques that we devised to help them learn how to use those important words. We have received grateful letters from across the country and abroad, praising us for the timeliness of our selectionwords appearing in newspapers and books, on standardized exams, and in business correspondence.

That response is very gratifying. We realize that possessing a rich treasury of words brings material gains as well as confidence in one's ability to communicate and to be accepted as a mature person. As you spend the time to master the 1100 words and idiomseven 15 to 20 minutes dailyyou will discover the pleasure of recognition and understanding when you come across these challenging words in your listening, reading, and conversing.

For the Second Edition, published in 1987, we added word games that enhanced the learning process and analogies that were useful for those who were preparing for college entrance tests. In the Third Edition, we took into account the newly revised SAT format by creating words-in-context segments called WORDSEARCHES, one for each of the 46 weeks. Now, in this Fourth Edition, we have updated all of the material and added a major component, "The Panorama of Words," where you will find a valuable sentence reference for each of the words you have learned. The material presented is consistent with our successful blueprint of interest, variety, relevance, and repetition. Regard it as a dividend on your investment.

Reading Wisely

The youngster who reads *voraciously*, though *indiscriminately*, does not necessarily gain in wisdom over the teenager who is more selective in his reading choices. A young man who has read the life story of every *eminent* athlete of the twentieth century, or a coed who has *steeped* herself in every social-protest novel she can get her hands on, may very well be learning all there is to know in a very limited area. But books are *replete* with so many wonders that it is often discouraging to see bright young people limit their own experiences.

Sample Sentences

On the basis of the above paragraph, try to use your new words in the following sentences. Occasionally it may be necessary to change the ending of a word; e.g., *indiscriminately* to *indiscriminate*.

- 1. The football game was ______ with excitement and great plays.
- 2. The ______ author received the Nobel Prize for literature.
- 3. My cousin is so ______ in schoolwork that his friends call him a bookworm.
- 4. After skiing, I find that I have a ______ appetite.

After his candidate had lost the election,

5. Modern warfare often results in the ______ killing of combatants and innocent civilians alike.

Definitions

Now that you have seen and used the new words in sentences, and have the definitions "on the tip of your tongue," try to pair the words with their meanings.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Reggie the Con Man

In the \bigcirc of crime, there are few scoundrels who could match the exploits of Reggie Hayes, who also used the names of Reginald Haven, Ricardo Hermosa, Father Harris, and dozens of other aliases. Reggie's police record, principally in Chicago and Baltimore, is \bigcirc with scams that he perpetrated upon gullible

people. Generally, his favorite target was a ³ _____ who should have known better.

Dressed as a priest ("Father Harris"), he was most convincing, however. His method of operation was to "find" a

wallet stuffed with hundred dollar bills outside a supermarket and then 4 _______ an unsuspecting woman to share his good fortune, since there was no identification in the wallet. But first, to establish her credibility, his victim had to put up a sum of money as a testimonial to her good faith. Mrs. Emma Schultz, age 72, tearfully told the police that she had withdrawn \$14,000 from her bank and placed it in a shopping bag supplied by the helpful priest. He told her to hold onto the bag while he went next door to a lawyer's office to make the sharing of their good fortune legal.

After a seemingly ⁽⁵⁾ ______ wait, Mrs. Schultz discovered to her chagrin that the heartless thief had skipped out the back way, leaving her "holding the bag"a switched bag containing shredded newspaperwhile he made his getaway with her life savings.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Driving While Drunk

Throughout literature we find recurring tales of forthright people who are outspoken in condemning illegal practices only to be brought low themselves when they, or members of their families, commit such acts. Since literature

reflects life, we can expect to find similar instances in which a person's 0 are compromised, and he

falls prey to the ② ______ evil that he had publicly denounced.

Take the story of Barry Vernon (not his real name), an aggressive Ohio district attorney. Vernon could be counted

upon to make ³ ______ remarks about anyone who was driving while intoxicated. On numerous speaking

engagements, he railed against drunkenness and swore that any such 4 ______ who was found behind the wheel of a car would be prosecuted to the full extent of the law.

As fate would have it, Vernon's own son smashed into several cars, injuring four people seriously, and then failed a sobriety test.

Following that ⁽⁵⁾ _________ violation of the law, Vernon resigned from office, saying that as a private citizen he would continue his crusade against those who drive under the influence of alcohol. Meanwhile, he wished to spend more time with his son to try to understand the young man's behavior.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Trouble at Truman High

It was a quiet morning at Harry S Truman High School. "Too quiet," Principal Edna Suarez remarked to her secretary. "It's just when things are this serene that I start to get an uneasy feeling."

Mrs. Suarez's sensitivity to life among 3,000 teenagers quickly proved to be accurate. The first evidence of trouble

came with a phone call from the teacher in charge of the cafeteria who needed help to

disturbance. When Mrs. Suarez arrived on the scene, much to her 2_____, students were pounding on their

tables, throwing food on the lunchroom floor, and making a complete ③ _____ of school regulations. It took

the principal only a moment to 4 ______ who the two ringleaders were and to summon them to her office.

Vincent, 16, and Elena, 15, admitted to having stirred up the protest. They gave as their reasons the poor quality of food served and the dirty environment. "It's like a pigsty down there," Elena declared, "and the food is fit only for animals!"

What they had done, Mrs. Suarez told them, was inexcusable, and she ticked off a list of reasons that made their conduct dangerous and subject to school discipline. "What you were trying to do," Mrs. Suarez explained, "might be

considered ^Y______ by some but you could have come to me, alone or with a committee, to register your complaints. I would have investigated and, if there was merit to your charges, would have taken the necessary action. Now I'll have to ask you to bring your parents to see me on Monday and to stay home until then."

Vincent and Elena seemed to be chastened by Mrs. Suarez's lecture. However, on leaving her office, Elena told an assistant principal that in a similar incident on a television show she learned that direct, dramatic action usually gets quicker results than lengthy debate. He advised her to bring that question up in her social studies class when she returned from suspension.

Much Ado About a Haircut

Perhaps you read about our school in the newspapers? We were one of the first to have a showdown on the topic of long hair for boys. Two honor students, Ron Harris and Len Chester, were sent to the principal by their French teacher, an *implacable* foe of nonconformists, who went into a *paroxysm* of anger when she spied the boys in the hall. At first it seemed like a simple case. The school would reprimand* the boys for their *reprehensible* appearance and order them to cut their hair or be suspended. But the boys' parents decided that the school had overstepped its *jurisdiction*; they took their case to the newspapers. What had started as a local *skirmish* now began to take on the appearance of a full-scale war.

The school authorities were *stymied*. Public opinion had been marshaled against them. No longer was it a simple case of disciplining two wayward lads. Suddenly it had taken on the appearance of a nightmare in which the principal was either hanged in *effigy* or pictured in cartoons making a villainous swipe at the two innocent Samsons. But the officials could not allow Ron and Len to *flout* their authority with impunity.* Members of the school board concurred* with the principal's action but they were *cognizant* of the popular support for the boys. The Reading of the Will

One full week after the funeral, the immediate family of millionaire Charles Hudson was gathered in a law office to hear the reading of the deceased's will. Mr. Hudson's wife, thirty years his junior, was prepared for a bitter

____ with his former wife and her son. The lawyer, Don Rollins, anticipated a 2 ______ session

because he was the only one who was 3 ______ of the contents of the revised will that Hudson had ordered drawn up six months prior to his death.

The current Mrs. Hudson, attired in her smart widow's weeds, expected that she would receive the lion's share of the estate. The former Mrs. Hudson felt that she was entitled to most of the estate since she was practically

(4) ______ at the present time, despite her substantial alimony payments.

Lawyer Rollins cleared his throat and began to read:

"To my present spouse I leave my town house where she can continue to store the jewels, shoes, dresses, and furs she accumulated in two years of shopping and marriage.

"To my son, who has put off finding a career until my estate would enrich him, I leave the sum of ten dollars for cab fare to the unemployment office.

"To my former wife whose ⁽⁵⁾ ______ behavior I tolerated for three decades, I leave my beach house where she can continue to work on her tan, something that she prized above our happiness.

"To the Society For the Prevention of Cruelty to Animals I leave the remainder of my entire estate, knowing they will put it to better use than anyone in this room."

The lawyer was wrong. No outcries. Silence, supreme silence, reigned among the shocked audience.

After an extensive lecture tour in 1956, Dr. Dooley returned to Laos to set up a mobile medical unit. Today, the *blatant* bigot, the leader of a lunatic fringe, and the hate-monger, each with his tiny *entourage*, find it relatively easy to attract publicity. Newspapers give space to the *virulent* activities of those agitators on the grounds that they are newsworthy. This Century's Deadliest Disease

When the American public started to hear about the AIDS virus in the 1980s, there was a measure of concern but no real alarm. After all, some said, it was a problem solely for a small group of intravenous drug users who shared dirty needles, and for the homosexual community.

But as the numbers of afflicted people grew during the 1980s and 1990s, we began to \bigcirc the tragic news stories more closely. The deaths of young people like Ryan White and Kimberly Bergalis, not members of the

In the mid-1980s, medical researchers were optimistic that a vaccine for AIDS would be found in short order. Those predictions proved to be inaccurate. In October 1992, former Surgeon-General C. Everett Koop

The Potato that Strangled Idaho

People who are \bigcirc about the sight of blood or \bigcirc in horror from most forms of violence would do well to avoid some of the movies now being shown at their local cinemas. Producers have learned that films that scare the patrons out of their seats, ironically, put millions of fans into those seats, keeping them

_____ in the goose pimple-inducing spectacles that flash across the screen.

Of course, each movie carries with it a rating that indicates its suitability for certain age groups, either because of its subject matter, language, presentation, or level of violence. Pictures with a "G" rating are approved for all audiences, while, at the other end of the scale, those that are given an "X" rating are for adults only with no children allowed under any circumstance. Getting an "R" rating indicates that the movie is restricted (no one under 18 admitted without an adult) but some Hollywood moguls consider the "R" to be the magnet that insures box office success. And we can be sure that as long as shock films ring up a merry tune on the cash registers, producers will not

college lecture that his work was in good taste. One student who disasgreed was provoked to <u>update</u> that in his opinion the diet of "shock-schlock" movies was in worse taste than those pictures that contained vulgar language and nudity. "At least they're honest," he declared.

Regis, Oprah, Sally Jessy, et. al.

The television talk shows of our era, featuring such upper public figures as Regis Philbin, Oprah Winfrey, and Sally Jessy Raphael, attract millions of daytime viewers and constitute a powerful influence on the American scene. When the media can hold the attention of so sizable a chunk of couch potatoes, it pays to scrutinize it closely.

A student at Stanford University, doing her doctoral thesis on the unusual popularity of the afternoon talk shows, noted the fierce competition among those programs for guests who are off the beaten track. According to her:

"Almost every irregular, 2 ______ life-style you can think of has already been featured on one of the shows

and probably on all of them, when you add Montel Williams, Jerry Springer, and others of that who serve as network hosts. They have shown teenagers who marry people in their sixties, daughters and mothers who date the same man, men who have gone through a marriage ceremony with other men, women with prominent

tattoos, and other people who are totally free of 4 _____."

" ⁽⁵⁾ ______ for our guests is so small," said a producer, "that these shows are inexpensive to put on. And say what you want about good taste, millions watch us every day, and as long as the ratings are that healthy, sponsors will pay good money to be identified with us."

A Visit to the I	President				
A Visit to the President In the winter of 1941, Enrico Fermi and a number of other distinguished scientists <i>importuned</i> President Franklin Roosevelt for authorization to begin an all-out effort in atomic energy research. The scientists were alarmed by <i>incontrovertible</i> evidence of <i>surreptitious</i> German experiments, and they asked for speedy approval. Italian-born Enrico Fermi was the ideal man to lead the atomic research. Already in 1938 he had won the Nobel Prize for work with radioactive elements and neutron bombardment. Fermi had found a <i>haven</i> from the Fascists (his wife was Jewish) and he knew that if the Germans were the first to develop an atomic bomb it would mean that Hitler could <i>subjugate</i> the entire world. The international race for atomic supremacy was on.

The Ultimate Weapon Takes Shape

Enrico Fermi designed a device that could *eventuate* in a chain reaction. It consisted of layers of graphite, alternated with chunks of uranium. The uranium *emitted* neutrons, and the graphite slowed them down. Holes were left for long cadmium safety rods. By withdrawing those control rods Fermi could speed up the production of neutrons, thus increasing the number of uranium atoms that would be split (fission). When the rods were withdrawn to a critical point, then the neutrons would be produced so fast that the graphite and cadmium could not absorb them. In that manner a chain reaction would result. Slowly, Fermi's first atomic pile began to grow in a *subterranean* room at Columbia University. The big question remainedwas it *viable*?

The Squash Court Experiment

As the pile grew, so did the entire project. Fermi moved his materials to an abandoned squash court under a football stadium at the University of Chicago. His pace accelerated because they were proceeding on the *premise* that the Germans were close to atomic success. Six weeks after the pile had been started, its critical size was reached. Three brave young men *jeopardized* their lives by ascending* the pile, ready to cover it with liquid cadmium if anything went wrong. Almost fifty scientists and several incredulous observers mounted a balcony to watch. One physicist remained on the floor; it was his job to extract the final cadmium control rod. Unbearable tension *permeated* the atmosphere. Fermi completed his calculations, waited for a *propitious* moment, and then gave the signal.

Sunday Morning at Pearl Harbor

At breakfast time on Sunday morning, December 7, 1941, Dorie Miller was serving coffee aboard the battleship West Virginia. Dorie was black, and the highest job to which he could then aspire in the U.S. Navy was that of messman. While Dorie was technically a member of a great fighting fleet, he was not expected to fight. Most Army and Navy officers inveighed against blacks as fighting men. Although blacks were nettled by such overt prejudice, Dorie Miller apparently accepted being *relegated* to the role of a messhall servant. Now, as he poured the coffee, Dorie was wondering why the airplanes above were making so much noise on a peaceful Sunday morning.

The Effects of the Escobedo Decision

After Danny Escobedo's release from prison, hundreds of inmates began suits for their freedom on the grounds that their rights had been violated, too. Each case was heard on its merits, and in numerous instances people who had been convicted of serious offenses were freed because of the new standards established in the Escobedo case. After getting out, Danny was not a *paragon* of virtue, according to the police. He led a *nomadic* existence, drifting from job to job, and was arrested frequently. With *asperity*, and a few choice *epithets*, Danny referred to police harassment.* Although the Escobedo case was a *controversial* one, most agree that it inspired better police training, better law enforcement procedures, and improved scientific crime detection.

Questionable Advertisements

The Nostalgia Factory, a Boston art gallery, staged an exhibit of advertisements that had outraged various segments of the community. For example, one of the fast food chains ran a TV commercial that showed unattractive school cafeteria workers in hairnets, making that experience less tasty than a visit to Roy Rogers. Another ad that drew criticism from psychiatrists and groups such as the Alliance for the Mentally III suggested to readers that, if they had paid \$100 for a dress shirt, they were fit candidates for a straitjacket. Similar sensitivity had restricted ad writers from using terms such as "nuts" or "crazy."

Meet the Bees				
One of the most interesting inhabitants of our world is the bee, an insect that is <i>indigenous</i> to all parts of the globe except the polar regions. The honeybee is a <i>gregarious</i> insect whose <i>habitat</i> is a colony that he shares with as many as 80,000 bees. Although the individual bees live for only a few days, their colony can be operative for several years. A <i>cursory</i> study of the activities of these insects reveals an orderliness and a social structure that is truly amazing. For example, bees in a particular hive have a distinct odor; therefore, when an <i>interloper</i> seeks access* they can identify him quickly and repulse* his invasion.

Each colony of honeybees consists of three classes: a) the queen who is a *prolific* layer of eggs; b) the worker who is the *bulwark* of the colony; and c) the *sedentary* drone whose only function is to mate with a young queen. The queen lays the eggs that hatch into thousands of female workers; some queens live as long as five years and lay up to one million eggs. The *frugal* worker builds and maintains the nest, collects and stores the honey, and is the *antithesis* of the lazy drone, or male honeybee, who does not work and has no sting. The Saga of the Queen Bee

Although the *virtuosity* of the workers is remarkable, the queen bee is really the main story. Workers choose a few larvae to be queens, feeding them royal jelly, a substance rich in proteins and vitamins. While the queen is changing from a larva to a pupa, a team of workers builds a special cell for her. Soon the young queen hatches, eats the prepared honey, and grows strong. After she kills any rivals who have the *temerity* to challenge her, an *amorous* note is injected. She flies from the hive and mates with one or more drones on her first flight. Then the process of egg laying begins. When her *progeny saturate* the hive, scouts are dispatched to find a new location, and the bees swarm after their leader to begin the amazing cycle again.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

A Shameful Situation

The plight of the migrant farm worker continues to frustrate the U.S. Labor Department, court officials, legislators, religious groups, and community agencies. ramshackle dormitories, often with non-functioning toiletsa \bigcup of their employers' contempt for them; they lack hot water and showers, and are given food that is barely fit for human consumption.

Unscrupulous contractors scour the countryside in search of homeless, women, offering to put them to work at good jobs picking fruits and vegetables. The U.S. Labor Department

investigates the ⁽³⁾ ______ of complaints of abused workers, issues fines, and revokes the licenses of

contractors. But many such shady employers pay the fines (which they 4 ________ to be operating expenses)

Fred Jones, a typical migratory worker from South Carolina, claims to have worked for \$6 cash out of his \$158 check. His story is repeated by hundreds of others who have been treated shabbily by corrupt contractors. Until sufficient funds are allocated by state and federal agencies, and until there is the proper public response, these abuses will continue.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Ogopogo

Accounts of supersized creatures such as the Loch Ness Monster and the Abominable Snowman are

① ______. Despite the lack of hard evidence, some people continue to believe that the depths of our lakes and isolated mountain caves remain the dwelling places of fantasy figures.

Now, a new star for the credulous has surfaced. Japanese television was asked to ______ a search for Ogopogo, a long-necked reptilian creature said to inhabit Lake Okanagan in the mountains of south-central British

Columbia. Ogopogo stories are 🥝 _____ in that area as people produce photos of rippling water and shadows resembling an enormous serpent with flippers, gliding slowly in large circles.

Those who ⁽⁴⁾ ______ at what they regard as nonsense and pagan superstition are quite ⁽⁵⁾ ______ in belittling Ogopogo fans. Nevertheless, the legends, which have a life of their own, happily, have brought thousands of tourists and business to the Okanagan Valley.

Recognition of the creature now exists in British Columbia's environmental law which provides protection for Ogopogo. The official description reads, "An animal in Okanagan Lake, other than a sturgeon, that is more than three meters in length, and the mates or offspring of that animal."

Been wondering about the creature's name? Ogopogo comes from an English music hall song: "His mother was an earwig; his father was a whale; a little bit of head and hardly any tailand Ogopogo was his name."

"I know that women are fighting for equality," said the owner of a chain of unisex hair salons, "but this is ridiculous. We cut a man's hair in no time but we have to get more money from our female customers because their styling and cutting takes so much longer."

The argument might be the ⁽⁵⁾ _______ to an important court case. A city-proposed settlement, however, is to have those salons that are cited for violations of the law offer free haircuts to women for a period of three months before having to pay a stiff fine for repeated offenses.

"It's easier to comply," shrugged one owner (bald, himself).

From A to Z					
Ellis Sloane, a teacher of science at a large metropolitan high school, first paid little attention to the fact that his two biology classes were so disparate* in their performance. In most schools the classes are alphabetically <i>heterogeneous</i> , with youngsters' names running the <i>gamut</i> from Adams to Zilch. But Biology 121 had only A's and B's, whereas Biology 128 had T's, V's, W's, Y's, and Z's. Mr. Sloane, a <i>perspicacious</i> teacher, began to perceive* differences between the two groups: while their reading scores and I.Q.'s were roughly <i>analogous</i> , it was apparent that Biology 128 was replete* with <i>maladjusted</i> students, while Biology 121 had the normal ones.

Microsociety-An Antidote for School Boredom

Money, taxes, employment, legislationthese are topics that we associate with the adult world. George Richmond, a

Yale graduate who became a \bigcirc in the New York City school system, felt that elementary school youngsters could also be interested, even excited, about such issues. He experimented in his own classes with the *Microsociety* in which basic instruction takes place and is reinforced as pupils operate their own businesses, pass laws, live within the parameters of a constitution that they drafted, seek redress within their own judicial system, buy and sell real estate, and so on.

Richmond's book on the Microsociety came to the attention of the school board in Lowell, Massachusetts, and their

members decided to give it a try in 1981. In much less than a ⁽²⁾ ______ the results were quite remarkable: students exceeded the norm in reading and math; 8th graders passed college level exams; school attendance went up to 96%; and the dropout rate took a nosedive in Lowell.

In *Microsociety's* (3) ______ classes, mornings are given over to the traditional curriculum. In the afternoon,

the students apply what they learned in activities that run the 4 _______ from keeping double entry books, doing financial audits, running a bank, and conducting court sessions to engaging in light manufacture that leads to retail and wholesale commerce.

Other ⁽⁵⁾ ______ school systems have since adopted George Richmond's innovative ideas. "*Microsociety*," said a Yonkers, New York principal, "gets kids to role-play life!"

A *Time Magazine* reporter was much impressed with *Microsociety*'s results: "Such an approach would go a long way toward making U.S. public schools a cradle of national renewal."

Primitive Magic

In the course of their studies of other cultures, *anthropologists* have reported numerous customs and practices that seem *bizarre* to the average American. Many primitive people believe that certain *inanimate* objects have a will of their own and possess some magical powers. These *fetishes* may be simple things like a particular feather of a bird or a unique pebble. The *fetish* might have derived its power, according to members of some tribes, from a god who lives within the object and has changed it into a thing of magic. *Fetishes* need not only be natural objects, however. An *artifact* such as a sculpture or carving is also believed to possess supernatural powers.

The presence of an ever-flowing supply of fresh, clean water is taken for granted. Unfortunately, this *congenial* condition is fast disappearing. As our population increases, as industry consumes more water each year, the level of our underground water supply sinks measurably. There is no way to *hoard* water; there are many ways to conserve it. During a particularly dry spell, New York City found its reservoirs going dry. Only then did the residents begin to heed the *sage* advice to limit the wasteful uses of water. Under the *aegis* of the Water Commissioner, citizens were encouraged to develop habits that would save water. The continued imprudent* waste by each of us of this most basic resource will work to the *detriment* of all.

An Ageless Story

Every so often we can read about a man or woman who has reached an age far beyond the limits we ordinarily expect. Reports of a man in Chile or a woman in Turkey who has celebrated the 105th or 110th birthday occur regularly. The natural question is, to what do these people owe their *longevity*? Frequently, the answer concerns the fact that the ancient one liked to *imbibe* regularly of some hard liquor. The photograph will show an apparently *virile* man or robust woman. Somehow, people who reach this advanced age seem to remain eternally sturdy. There are no signs that they have become *senile*. Smoking a pipe, or sewing on some garment, these rare specimens of hardy humanity are far from the *doddering* folk we expect to see.

The Lack of Foreign News

The critics *rebuke* the press for the fact that most newspapers devote somewhat less than 10 percent of their news space to foreign items. In many hundreds of papers this falls below two percent. Why is there this *aversion* to foreign news? Newsmen claim that readers *evince* no interest in foreign affairs. In order to increase reader interest in foreign news, the *vogue* among editors is to sensationalize it to the point of distortion. Many other papers do only the most *superficial* kind of reporting in this area.

A Dangerous Sport

Racing car drivers are vulnerable to dangers that other sportsmen seldom face. Drivers agree that controlling a car at top speeds on a winding course is a singularly* awesome* experience. There is the *bedlam* caused by the roaring motors that move the car from a standing start to 100 miles an hour in eight seconds. One is shaken by the cacophony of the brakes, larger than the wheels and producing during the course of a 350-mile race enough heat to warm an eight-room house through a hard winter. The driver needs to be on the alert to exploit any mistake by an opponent, and he must be constantly aware of the *propinguity* of sudden death. All of this makes car racing one of the most demanding games of all.

How was your recall today? Did you spot vulnerable as a reintroduced word?

The man who best described the now *extinct* life aboard a steamer on the Mississippi River is Mark Twain. Having actually worked aboard the river boats, his writing captures the tranquil* or turbulent* events of those days. In his book about life on the Mississippi, Twain recalls the *idyllic* times when man was not in such a great rush to get from one place to another. One chapter deals with the races conducted between the swiftest of the boats. When a race was set, the excitement would *galvanize* activity along the river. Politics and the weather were forgotten, and people talked with gusto* only of the coming race. The two steamers "stripped" and got ready; every *encumbrance* that might slow the passage was removed. Captains went to extremes to lighten their boats. Twain writes of one captain who scraped the paint from the *gaudy* figure that hung between the chimneys of his steamer.

Mark Twain's boat was so slow no other steamer would *condescend* to race with it. With the utmost *candor*, Twain comments that his boat moved at such a pathetic* pace, they used to forget in what year it was they left port. Nothing would *mortify* Twain more than the fact that ferryboats, waiting to cross the river, would lose valuable trips because their passengers grew senile* and died waiting for his boat, the *John J. The Riverboat Pilot

The riverboat pilot was a man considered *omnipotent* by all. Mark Twain once held that high position. He writes that he felt at the *zenith* of his life at that time. Starting out as a *fledgling* pilot's apprentice, he could not abjure* dreams of the time he would become, "the only unfettered and entirely independent human being that lived in the earth." Kings, parliaments, and newspaper editors, Twain comments, are hampered and restricted. The river pilot issued *peremptory* commands as absolute monarch. The captain was powerless to interfere. Even though the pilot was much younger than the captain, and the steamer seemed to be in imminent* danger, the older man was helpless. The captain had to behave impeccably,* for any criticism of the pilot would establish a pernicious* *precedent* that would have undermined the pilot's limitless authority.

The Double Cross

Many incidents that took place aboard his ship are re-told by Twain. One has to do with a wealthy cattle man who was approached by three gamblers. The cattle farmer had let it be known that he had a great deal of money, and the gamblers were trying to wheedle him into a card game. He protested that he knew nothing about cards. His rustic appearance confirmed that fact. On the last night before landing the three gamblers got him drunk. When the first hand was dealt, a *jubilant* expression came over his face. The betting became furious. All of the proper *decorum* was put aside, and ten thousand dollars soon lay on the table. With the last wager one of the gamblers showed a hand of four kings. His partner was to have dealt the sucker a hand of four queens. At this point the victim, the charlatan, removed the veneer* of respectability, and showed a hand of four aces! One of the three professional gamblers was a clandestine* confederate of the "rich cattle farmer." They had been planning this duplicity* for many weeks.

Choose Sagely*

Today, the paramount* influence in the forming of public opinion is propaganda. It is not a *heresy* to our democratic beliefs to state that pressure groups play an important part in our lives. Propaganda makes one vulnerable* to the influences of others. The *prudent* person will choose between cogent* and specious* propaganda efforts. While propaganda has the *ostensible* purpose of informing the public, the most *fervid* propagandists use methods that must be examined by the thoughtful citizen. The ability to distinguish the *spurious* from the true facts requires more than a perfunctory* examination of prevalent* propaganda efforts.

A Free Society

In a free society it is intrinsic* that individuals and groups have the inherent* right to *propagate* ideas and try to win converts. We do not look upon an idea different from ours as an *anomaly* that should be precluded*. Nor do we permit only *innocuous* or congenial* beliefs and forbid those that we believe are dubious* or spurious*. In a country of competing pressures we are accosted* by a *surfeit* of propaganda that tends to overwhelm us. Thus, we live in a *milieu* of ubiquitous* bombardment from countless, and often unrecognized, propagandists.

Who Listens?

As the quantity of propaganda becomes greater, ideas are presented in more *strident* tones in order to overcome the increased competition. Those who are the targets of the propaganda find it more difficult to discern* between or analyze the new and expanded pressures. The *concomitant* situation that develops with the stepped-up propaganda is one in which the individual retreats into a state of *lassitude*. He has an aversion* to all attempts to influence him. So we can see the intrinsic* weakness inherent* in an increased level of propaganda. It has the *deleterious* result of reducing its *efficacy* upon the individuals or groups who were its objective.

A Formidable Opponent

One of the most interesting tests of a computer's ability to "think" occurred in 1992. The world's chess champion, a
man of \bigcirc mental ability in this sport, was challenged to compete against the most powerful computer
programmed to play chess. The question was, could a machine \bigcirc a human's place as the best chess player in the world?
The match took place before hundreds of chess enthusiasts and was recorded on film. While the computer lacked the
champion's experience and emotional capacity, it worked with such many thousands of choices, well beyond what any human could envision. In fact, the computer had already defeated
many ④ chess masters in preparation for the contest.
The result of this test match was fairly easily. However, there is almost total agreement that it is only a matter of time before we have an electronic chess champion, one incapable of making a blunder. At that point it will be checkmate for all of us.

Making Plans

Robert had arrived in New York a week earlier. He had begun by asking *discreet* questions of Evelyn's former landlord. There was no need to *foment* opposition at the very beginning. The landlord was recondite,* and all Robert had been able to *glean* from the cryptic* replies was that Evelyn had moved to a residence that catered to single women. Robert was in a hapless* situation; in this immense city his *quarry* could be hiding in one of dozens of such places. This would obviate* the possibility of his dashing from one place to another in an impetuous* manner. His search, while it had to be concluded with celerity,* could not be carried out in such *slovenly* fashion. He required a succinct* and meticulous* plan.

A Newspaper Ad

On the premise* that Evelyn knew she was being sought, Robert's first step was to *abjure* fruitless* searching and place an ad in the leading morning newspaper. He would importune* in a most careful way for her return. The ad read, "Evelyn. Come out of hiding. I do not *reproach* you for your actions. I expect no *penitent* confession. There is nothing ambiguous* about my offer. Please contact. Robert." He added a box number for a reply. When Robert went to the paper the next morning, he felt sanguine* about the chances of locating her. His *evanescent* concerns disappeared; there was a letter for him, and with tremulous* fingers he tore it open. It contained one sentence, and it was *tantamount* to a challenge; "If you really care about me, you will find me by midnight, Friday, Evelyn."

Evelyn was an anomaly*: she had a *propensity* for folk music and rock and roll dancing, and, at the same time, she was an avid* fan of classical ballet. It was Tuesday evening; two days gone with so little to show. Only three more remaining before the deadline set by Evelyn. He tried hard to *allay* the sudden fear that came over him that he might not locate her. Nothing would *deter* him from succeeding! Modernizing a Parable*

Thurber punctures in an incisive* way the platitudes* that come from stories handed down through the generations. These old saws are accepted by everyone. One such tale is about a tortoise who had read in an ancient book that a tortoise had beaten a hare in a race. The sage* old tortoise construed* this story to mean that he could outrun a hare. With *equanimity* he hunted for a hare and soon found one. "Do you have the *effrontery* to challenge me?" asked the incredulous* hare. "You are a *nonentity*," he scoffed* at the tortoise. A course of fifty feet was set out. The other animals gathered around the site*. At the sound of the gun they were off. When the hare crossed the finish line, the *flabbergasted* tortoise had gone approximately eight and three-quarter inches. The moral Thurber draws from this *debacle* for the tortoise: A new broom may sweep clean, but never trust an old saw.

Thurber modernizes an old story that everyone has read or heard. It has to do with a nefarious* wolf who kept a vigil* in an ominous* forest until a little girl came along carrying a basket of food for her grandmother. With alacrity,* this <i>vivacious</i> youngster told the wolf the address to which she was going. Hungry and <i>gaunt</i> the wolf rushed to the house. When the girl arrived and entered, she saw someone in bed wearing a nightcap and a nightgown. While the figure was dressed like her grandmother, the little girl surmised* with only a perfunctory* glance that it didn't have the old lady's <i>mien</i> . She approached and became cognizant* of the <i>hirsute</i> face of the wolf. She drew a revolver from her purse and shot the interloper* dead. Thurber arrives at a moral for this story that anyone would find difficult to <i>refute</i> : It is not so easy to fool little girls nowadays as it used to be.

Another Surprise

Thurber's stories are written in a jocose* manner, but they contain enough serious matter to make one *pensive*. He tells of some builders who left a pane of glass standing upright in a field near a house they were constructing. A goldfinch flew across the field, struck the glass and was knocked inert.* He rushed back and divulged* to his friends that the air had crystallized. The other birds derided* him, said he had become irrational,* and gave a number of reasons for the accident. The only bird who believed the goldfinch was the swallow. The goldfinch challenged the large birds to follow the same path he had flown. This challenge served to *whet* their interest, and they agreed with gusto.* Only the swallow abjured.* The large birds flew together and struck the glass; they were knocked into a *stupor*. This caused the astute* swallow to *wince* with pain. Thurber drew a moral that is the antithesis* of the *cliché* we all accept: He who hesitates is sometimes saved.

The study of the human mind and behavior has had many prominent practitioners, but no one is more revered* than Sigmund Freud. An Austrian physician, he is said to be the father of psychoanalysis. Make My Ostrich Burger Well Done

Just about 100 years ago, there arose an industry in the state of Arizona that seems very odd to us today. We know of cattle ranches and sheep ranches, but would you believe . . . ostrich ranches? This business became popular as women found ostrich feathers a (2)_____ addition to their wardrobes. Ostriches are easy to raise. They eat and drink less than cattle, and their eggs are large enough to feed ten people! During the \Im days of ostrich ranching, feathers were sold for as much as \$300 a pound, so it is easy to see why that business was so attractive. However, women's fashions changed after World War I, and the market for ostrich plumes fell. Growers had to (4) a shrinking market. The price tumbled to about \$10 for a bird. As ostrich feathers became (5) in the fashion world, ostrich ranching came to an end. Interestingly enough, ostrich ranchers may be coming back into vogue because nutritionists tell us that ostrich meat is low in cholesterol. We may not go wild over the feathers, but pass the lean meat, please. Hold the mayo, too. Clues 3rd Day 2nd Day 2nd Day 1st Day 2nd Day

The Enigma* of Fashion

Of all the pressures young people face, the most pernicious* is that of fashion. By this is meant the current vogue* in dress. The teenagers, who are so *glib* when they speak of "individuality," are turned into a *homogeneous* mass by the latest craze in fashion. How can youngsters who vehemently* resist advice from the older generation become so *malleable* in the hands of those who "make" fashion? Perhaps the sudden shifts in fashion occur fortuitously*. Or is there some group who, through *legerdemain*, switches styles and customs on us right before our eyes? Today's teenagers seem to be quite gullible* when it comes to embracing the latest *trend* in fashions. But then, they have their elders as sage* examples to follow.

What is often ignored is that the young consumers <i>capitulate</i> to what is originated* by someone outside of their group. The feelings of individuality and <i>audacity</i> that the teenager gets from a new style of dress result from the propensity* of their elders to disparage* them. Something for Everyone

To the derogatory* comments from the older generation the teenagers might *retort* that new fashions and styles are adopted by the elders with alacrity.* Though they complain, women emulate* their daughters by shortening or lengthening their hems. They may appear *reticent* about the bother and expense of altering their wardrobe, but they give *tacit* approval to the change by rushing to the department stores where they jostle* each other to buy copies of the more expensive dresses. The conclusion one might reach after observing how women countenance* the arbitrary* changes year after year is that they are naïve* or victims of some *chicanery* practiced by the clothing industry. Women may appear hapless* before the intimidation* of "style," but the real truth may lie in the fact that they are so *docile* because they secretly enjoy the yearly excitement around the latest fashions.

Recently, there has been an attempt to improve Captain Bligh's tainted* image. Historians maintain that there was no turpitude in Bligh's actions aboard the H.M.S. *Bounty*. Seeing Is Le	arning					
While we are all cognizant* of the importance of words to create certain impressions, gesture is relegated* to a much lesser role. Gestures are an important concomitant* to even the most <i>vapid</i> speech, enhancing it and giving the hearer something to look at while he listens. The value of seeing at the same time as listening was shown when a class at a university, <i>unwieldy</i> because of its large size, was split up. he listens. The value of seeing at the same time as listening was shown when a class at a university, *unwieldy* because of its large size, was split up. One group was put into a room in close *proximity* to good loudspeakers. Every nuance* of the lecturer's voice could be heard clearly. Because they had no person on whom to place their attention, they soon took on the appearance of extreme *lassitude*; most students became lethargic* and rested their heads on their desks. The separation of visual and aural communication tended to *vitiate* the learning process. The listening group received grades lower than those received by those who could look at as well as hear the instructor.

Once more your keen eye and memory were being tested. Did you recognize lassitude as being from an earlier lesson?

The Hammy Old Days

Actors depend upon their ability to gesticulate* almost as much as upon speech to obtain their desired histrionic* effects. With them, gesture serves much more than merely to *augment* speech. When their communication is by gesture alone, it is called pantomime. In the early silent motion picture period, gestures were flamboyant.* To show that he was distraught* about the danger in which the heroine had been placed, the hero would go through the most *fatuous* actions. He would stagger, beat his breast, tear his hair, and *contort* his face into the most doleful* appearance. There weren't many simple or restrained gestures in his *repertoire*. The heroine, to indicate her love, would fling her arms wide and ardently* jump into her sweetheart's arms. It was only much later that actors became skilled enough to communicate with the audience through discreet* gestures and almost *imperceptible* changes in facial expression that could transmit nuances* of emotion.

It's What's Outside That Counts

Packaging of grocery items is a facet* of advertising that is too little appreciated by consumers. Walking up and down the aisles of a supermarket, one seldom stops to analyze the individual package in the *potpourri* of items on the shelves. The manufacturer had to glean* and test many different designs before he accepted the one you see in the array* before you. Before he will *sanction* the use of a particular can, box, or bottle, he must know many things about its efficacy.* He wants to know if the colors attract: a white box may *denote* cleanliness, a red one, strength. There may be a photo or a drawing that will *allude* to the product's use or special qualities. A lackluster* package may be fatal.* Next, the size and shape are important elements. The housewife may want a small package for easy storing, but a larger package may suggest economy. A round bottle may look attractive, but a square one is easier to stack. These are some of the *insidious* aspects of packaging, the main purpose of which is to attract your attention as you peruse* the crowded supermarket shelves.

You Can't Help But Watch

The consumer is in a *quandary* about making a felicitous* selection among the array* of products. The advertisers must influence the malleable* consumer, and often they do it in the most *callous* ways. Television offers many tangible* advantages for reaching the consumer. As a result, the consumer is inundated* by commercials. The advertiser knows that a television commercial is the most *expedient* way to reach large numbers of people. The cost for each commercial film is prodigious,* but because the audience is so large, the cost per viewer is *negligible*. Whistle Blowing

There appears to be a question of how much loyalty employees owe to their employerswhether private or governmental. Many companies go out of their way to encourage employees to make suggestions that will improve

the way they operate. A \bigcirc employer will not criticize or reprimand an employee who points out problems having to do with the way other employees are harming the business. In fact, it should be in the bosses' interest that the person who has become known as a "whistle blower" is encouraged to alert them to a problem.

However, many such whistle blowers face harsh punishment for calling attention to illegal or unethical actions. The whistle blower soon becomes a ⁽²⁾ _____ in the workplace. Under the ⁽³⁾ _____ of some minor error,

or other excuse, the informer might be demoted, transferred, or fired. This 4 ______ often goes unreported. As a result, the employees go back to "business as usual" without any change. They become used to whatever they

One of the latent* dangers indigenous* to our constitutional guarantee of freedom of the press has to do with the protection of the individual against the detriment* that might come from news reports involving him. The Island of Wild Dogs

The saga* of the introduction of that *diminutive* song bird, the canary, into the homes of the world as tame pets is an interesting one. In the sixteenth century a trading ship going to Italy stopped at an island named "Canis," from the Latin word for wild dog, which could be found there in *profuse* numbers, off the coast of Africa. The *dulcet* song of the wild birds whetted* the interest of the captain. In *impromptu* cages hundreds were taken aboard to be traded. The sailors called these gray-green birds, spotted with yellow, "canaries." As they approached the island of Elba, near Italy, a *malevolent* storm put the boat in jeopardy* of sinking. A member of the crew released the birds, and the intrepid* canaries instinctively flew towards land. The peasants on Elba took the wild canaries in as pets. Eventually, the birds found their way into homes throughout Europe where they were domesticated and bred for variety of song and shades of colors. The canaries prevalent* today differ greatly from the ones discovered over four hundred years ago.

Reprieve for Wolves

One of the most difficult problems to resolve has to do with the conflicting interests of environmentalists and profitmaking businesses. Examples of this dilemma appear frequently. While the dispute about cutting down a forest to preserve owls has been in the news, there appeared another conflict in the state of Alaska. Hoping to increase the number of tourists who seek to hunt deer and caribou, the State of Alaska ordered the killing of some of the

Henry VIII and British History

Students in the United States should consider themselves lucky when it comes to studying the country's history. The

United States has been a nation for approximately 225 years. We would be \bigcirc _________ if we had to learn as much history as students in Great Britain, for their history goes back some 1,000 years! In that time England has had many interesting and unusual rulers. One who has fascinated us is Henry VIII. Ruling some 450 years ago, he

became well known because of his many marriages and his ⁽²⁾ ______ for doing away with some wives who displeased him.

In physical appearance he was unattractivehe was large and ⁽³⁾ ______. When his first wife could not bear him a son who would be heir to the throne, he divorced her. This caused a break with the Pope who refused to recognize

the divorce. Henry VIII sent an ⁽⁴⁾ ______ to the Pope and renounced Catholicism. He then married Anne

Boleyn but decided to her after quickly tiring of her. His third wife died in childbirth, and he divorced his fourth. His fifth, Katherine Howard, was also beheaded. Only his sixth wife was able to live on after Henry's death in 1547. From this brief history of only one English ruler, it is easy to imagine how much an English history student must learn in order to prepare for an exam. In Henry VIII's case, one would have to get a "head start."
